1. UVOD

1.1. Korišćeni programski jezici:

- HTML
- CSS
- JavaScript

1.2. Opis funkcionalnosti

Na svakoj stranici se dinamički ispisuje header i footer. Meni se ispisuje pomoću json fajla koji sadrži podatke za meni koji se učitavaju pomoću AJAX-a.

Takodje postoji i pop up tekst koji iskace kada dodamo film ili ga obrisemo sa Watchlist stranice, isto tako se pop up pojavljuje u proveri forme.

1.2.1. Index stranica

Na index stranici se nalazi grupa filmova koja je izvučena iz json fajla i koja se prikazuje nasumično svaki novim refreshom stranice.

1.2.2. Review stranica

Na toj stranici su izlistani svi filmovi koje json ima. Takođe je ispisano više detalja o filmovima ocena i trajanje, takođe i tekst o filmu koji se skraćen i sadrži Read More, kako bi korisnik mogao da uđe u konkretan film i vidi više detalja o njemu.

Što se tiče sortiranja mogućnosti sortiranja su
1. od A do Z
2. od Z do A
3. Po oceni

Što se tiče filtriranja možemo filtrirati po žanru, godini i trajanju filma

Na stranici je takodje kreirana paginacija koja dinamicki provera broj filmova i kreira paginaciju (Stavljeno je da ide 8 filmova po stranici).

U detaljima filmova ima dugme za dodavanje na Watchlistu koje sluzi za slanje id-ja filma u local storage.

1.2.3. Watchlist stranica

Takođe ima filtriranje i sortiranje u slučaju da korisnik želi da filtrira svoje filmove, pomoću local storage na stranici watchlist porede se id-jevi local storage i json fajla i tako prikazujemo korisnikove filmove.

1.2.4. Contact stranica

Sadrži samo formu koja proverava korisnikove unete podatke. Kada korisnik unese sve podatke i klikom na submit proverava se ispravnost podataka i ako su svi podaci ispravni inputi se brišu i iskače pop up tekst da je uspešno popunjena forma.

1.3. Template

Template link:

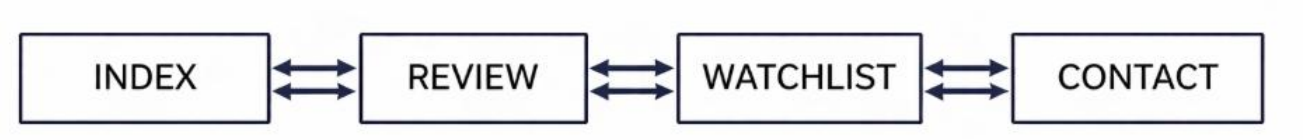
2. ORGANIZACIJA

2.1. Organizaciona šema

Sve stranice na sajtu su međusobno povezane. Osim Movie stranice koja se moze dohvatiti samo klikom na film.



2.2. Mapa sajta
